SUMMARY

Hi there. I'm Josh, a full-stack developer with design sense. Motivated by the warm and fuzzies I get from quality, my main focus so far has been React & PostgreSQL, but I play well with others. I also bring a lot of relevant skills to the table from my previous career as a licensed architect—eager problem solving, team communication, attention to detail, a passion for learning, every...single...day.

RECENT PROJECTS

v•able - [GitHub](#) | [vable.dev](#)

PostgreSQL | Express | React | Node

Connects experienced volunteers with non-profit organizations that have a specific need for skilled labor.

npmmm - [GitHub](#) | [npmmm.dev](#)

PostgreSQL | Express | React | Node | Redux

Saves and organizes user's most-used npm (node.js) packages. Imports & exports packages from a project using the companion command line tool.

PubCrawlHub - [GitHub](#) | [pubcrawlhub.dev](#)

jQuery | JavaScript | HTML5 | CSS3

Find bars and plan out a pub crawl using a sortable list and map directions from one location to the next.
